Profile Summary

As a Skilled MERN Stack & Next.js Developer with 1+ year experience building real-world projects. I specialize in building scalable, efficient, and user-friendly web applications. I am eager to contribute my expertise in full-stack development and problem-solving to innovative projects that drive business success and enhance user experiences.

Technical Skills

Frontend: React.js, Next.js, JavaScript (ES6+), HTML5, CSS3

Backend: Node.js, Express.js, RESTful APIs

Database: MongoDB, MySQL

Authentication & Security: Role-Based Access, OAuth, API Security

Real-Time: Socket.IO

Email & Communication: EmailJS, Brevo (Sendinblue), Nodemailer, SMTP

Integration Tools: Razorpay, JWT, Git, GitHub, Cloudinary, Render, Vercel, Netlify, Figma

UI & Animation: Figma, Framer Motion, AOS

Projects

Catering Website | MERN Stack

[Live](#) | [GitHub](#)

- Developed and deployed a production-ready website for a catering client.
- Improved performance using lazy loading and code splitting.
- Built SEO-friendly and fully responsive UI.

Real-Time Chat Application | MERN Stack, Socket.IO

[Live](#)

- Built a scalable real-time chat system using Socket.IO, enabling instant messaging between users with real-time communication.
- Implemented user authentication and live message synchronization.
- Handled multi-user communication with responsive UI.

Trading Journal Website | MERN Stack

[Live](#)

- Built a full-stack trading journal to log trades, track performance, and analyze risk-reward.
- Implemented JWT authentication and secure user data handling.
- Designed structured data models for efficient trade tracking and analytics.

Portfolio Website | Next.js, React, Tailwind CSS, Framer Motion, AOS

[Live](#)

- Built a modern portfolio with interactive UI and smooth animations.
- Integrated AI-based assistant to enhance user experience.
- Optimized for performance and SEO.

Experience

MERN Stack Intern — Project Management App | Acodez IT Solutions

- Developed full-stack features using React, Node.js, Express, and MongoDB.
- Collaborated with the team using GitHub, following structured code review practices to improve code quality and reduce production bugs.
- Contributed to scalable and maintainable code by adhering to clean architecture and best development practices.
